Because one of them is needed, no doubt, and that badly, among your household convenes, that the interious and troublesome item of churning may become an agreeable recrea what's the article? What's the description? What's it do, pray, Sir?

Well it is simply two screw-propeller wheels attached to the lower end of a staff or handle tion to the ladies, upon whom such duties usually devolve.

which is placed in the "old fashioned" wooden or inbehurn, and worked in the same man may precisely as the "old Dasher". these two whoels revolve rapidly and in counter direction at every up and down movement of the "Dusher," completely disengaging and cutting th eam into the minutest particles; while at the same time by aid of the "air beds" in each division of the wheels, keeps the whole bulk of the cream supplied with constant currents fresh sir, thus securing by the simplest process the true seinciples of "Good Sutter Making."

Well, sir, is the thing simple-very simple? Why, so very simple when sees, that not a word of explanation is necessary. Why " Rhi-dy," "Aunt Dinah," or the eightig ear old child can both understand and use it, and couldn't for heir lives imagine any other purpose for it. Is it durable and substantial, sir?

It is made of the best Sheet Zino-will not rost-strong-next, and with ordinary care, will last as long as you and your grand onlidren's children. Long enough; well, my friend, does it make GOOD BUTTER It does not only make good Hutter, but about ONE FOURTH MORE, to a given amount of serature and to about ONE HATE THE TIME required by the use of the "old dasher."
